## Everybody's Talking!

**Restaurant rankings:** The famous Michelin Guide, now a global authority on fine dining, began as something far removed from food. In rural France, the Michelin brothers were looking for ways to get more people driving, which would eventually boost demand for their tires. They launched a small book filled with practical tips for travellers, such as where to refuel, make repairs, or stop for a meal. Over time, its listings of restaurants gained influence, and the company started sending anonymous inspectors to evaluate quality. The star system was created, ranking restaurants from "worth a stop" to "worth a journey." Today, earning a Michelin star can transform a restaurant's future overnight.

**Barrier innovation:** Roads everywhere face the challenge of keeping drivers safe, and one solution gaining attention is the rolling barrier guardrail. Unlike fixed rails that can cause severe impacts, this design uses rotating cylinders that absorb impact and guide vehicles forward rather than letting them rebound into traffic or leave the roadway. The cylinders are made from durable materials, strong enough to handle weather while remaining effective for long periods. Though installation may cost more at first, reduced crash damage and lower medical costs make them worthwhile in the long run. Adaptable to highways, bridges, and sharp curves, these guardrails show how practical design can help reduce risks on busy roads.

**Failure archive:** In Edinburgh, Scotland, an unusual library is devoted not to great successes but to the many blunders of finance. The "Library of Mistakes" was launched by local financiers and academics who strongly believed that studying past failures could help prevent future ones. Inside, shelves are filled with detailed accounts of collapsed banks, scams, and infamous frauds. Visitors also find reminders of episodes like tulip mania, Ponzi schemes, and reckless investments that once brought institutions to their knees. The setting is modest but ambitious, and the library aims to become a leading archive of notable business missteps worldwide. The collection shows how even disasters ultimately can become knowledge.

**Octopus town:** In Jervis Bay, Australia, scientists found a gathering of gloomy octopuses living close together instead of alone. The octopuses created dens on the seafloor and interacted in ways that seemed more social than expected. Researchers observed both conflict and cooperation, suggesting the animals adjusted to living side by side. The area, nicknamed "Octlantis," formed naturally rather than around human-made objects, which surprised scientists. Some think the limited number of good hiding spots may explain the crowded conditions. While the reasons remain uncertain, the discovery shows these creatures are capable of more complex group living than once believed.

## PISCES

(Feb. 19 – March 20)

Early this week may be a good time to set new intentions toward your goals. However, you might want to wait a bit for things to settle before starting your efforts. Lucky numbers: 3, 4, 6, 15, 27, 40.

Lucky numbers this week: This week's odds favor Taurus winners with the luckiest number being 27.

## Did You Know...

**Pricey purple:** For centuries, purple almost never appeared on national flags, not because rulers disliked it, but because it was far too costly. Purple dye came from Mediterranean sea snails, making the color so rare it was typically reserved only for royalty.

**Whale songs:** Humpback whales create long, flowing songs that travel through the ocean and spread from one group to another. These tunes shift over time, showing how whales share and reshape their music much like a cultural tradition.

**Heel ban:** In Greece, sharp high heels are not welcome at ancient landmarks like the Acropolis or Parthenon. Officials banned them to prevent tiny cracks and scratches on fragile stone, while also reminding visitors that these historic sites need protection.

**Moon bricks:** Scientists are exploring how the moon's dusty surface could become building material for future bases. By testing volcanic powder on Earth, they've shown it might be possible to shape lunar dust into bricks strong enough for shelters in space.

**Hiccup odds:** Everyone knows the sudden jolt of a hiccup, but men are more likely than women to experience them, and they generally last longer in men. While short bursts usually fade, stubborn cases sometimes need extra care to settle down.

## On the Lighter Side

Knock! Knock! Who's there? Felix. Felix who? Felix my ice cream again, he's in trouble.

What did the tornado say to the sports driver? "Want to go for a spin?"

You can eat a sandwich any time of day. It's always a square meal.

What would life be like if there were no hypothetical questions?

Mama fish: "Don't bite that hook!"

Baby fish: "Why not?"

Mama fish: "You're too young to face the reel world."
